

**AMENDMENTS TO THE ABSTRACT:**

Please amend the abstract found on the last page of the specification as filed as indicated below by underlining, strikeouts, or double bracketing.

A rail fixing structure of a drawer which houses clothing and the like and is easy to mount. ~~The present invention provides a rail fixing part structure easy in a mounting operation.~~ A chest includes ~~is constructed by~~ a wooden chest body and a drawer of a synthetic resin, ~~and a drawer body is~~ the drawer is formed into a rectangular container shape. Metal rails that slidably support the drawer ~~at the chest body~~ are fixed to both sides ~~side portions~~ of the chest body, and flanges ~~which extend toward the drawer~~ are provided at rail lower edges ~~edge portions~~. A side and rear folded parts ~~part and a rear folded part~~ which are each constituted of an outward extending surface extending toward an outside and a downward extending surface extending downward are provided at an upper edge ~~portion~~ of the body. Upper ribs ~~extending downward~~ are provided at both ends of the side folded part and the rear folded part, while lower ribs ~~extending in a vertical direction~~ are provided at a side surface, so that the flange of the rail can be vertically sandwiched with the upper ribs and the lower ribs.
